

- 1.Created one class Pattern.
- 2.Took two for loop to get the desired pattern and traverse for 5 times.
- 3.Using if else set the condition to get the pattern.
- 4.Using print function *, " " is being printed.
- 5.Output is coming as expected.

```
C:\Users\IBM_ADMIN\javaprg>javac Pattern.java
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true
