1.Created a class Highest.

2.Took 3 integer variables a, b and c for taking the inputs by the user.

3.By using if ,else if and else we found the greatest number between three.

Screenshot:

```
C:\Users\IBM_ADMIN\javaprg>javac Highest.java
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true

C:\Users\IBM_ADMIN\javaprg>java Highest
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true
Enter the first num:
7
Enter the second num:
3
Enter the third num:
9
Largest number is: 9

C:\Users\IBM_ADMIN\javaprg>
